

think water Efficiency, think **TEAM Irrigation**

September 2009

Round Bale Feeder

TEAM Irrigation now stocks Durapoly Grain Feeders. Suitable for feeding grain & roughage mix to cattle in feedlots or for paddock fattening. Ad lib distribution means that cattle can access as much food as they need.

Features:

- Non Corrosive - lasts longer than steel feeders
- Weather hood protects feed from the elements
- Easy filling from ground level means there is no need to climb up on the feeder, thereby eliminating OH&S concerns
- Available in 2 sizes
- Skid available for transporting between paddocks - POA

Following TEAM Irrigation's success in winning the 2008 Dubbo Chamber of Commerce Rhino Award for Excellence in Rural Achievement, we are proud to announce that we are finalists in three categories in the 2009 Business Awards. We have successfully made the finals in the categories - Products & Services, Rural Achievement and Business Development. Winners will be announced at the Rhino Business Awards Night on October 16th and we would like to thank our staff and customers for supporting us to reach this outstanding achievement.

AgQuip Lucky Winner

The winner of our AgQuip Honda Firemate giveaway was Mick Charlton. Congratulations Mick and thank you to all entrants who visited our display at AgQuip in Gunnedah.
