

think water Efficiency, think **TEAM Irrigation**

August 2010

Are You Prepared For the Potential Irrigation Season?

Recent rainfall in the Macquarie Valley has increased the potential for increased water allocations for growers. Are you prepared to make the most of these favourable water conditions?

Now is the time to undertake equipment checks. TEAM Irrigation is prepared to:

- Kickstart pumps
- Repair pipes
- Monitor water meters
- Upgrade tanks
- Service & repair irrigators

We have qualified electricians, welders, irrigation technicians & poly-welders on staff. Let us help you be prepared.

Thinking of upgrading to improve water efficiencies on your property, then contact Tim or Craig on 6885 5220 to learn more about the latest irrigation advances.

Annual Recommended Maintenance Schedule

Regular maintenance of your pivots involves checking several key components and making any necessary repairs or replacements. Key inspection points include:

- Lubrication
- Electrical components
- Drive train and tyres
- Sprinkler package efficiency

Benefits of Regular Pivot Maintenance

Scheduling annual maintenance appointments for your pivots will assure a longer, more reliable life for your pivots – and more productive growing seasons for you. The benefits of regular maintenance include:

- Less downtime
- Lower operating costs
- Longer pivot life
- Higher trade-in value
- Better return on investment

TEAM Irrigation can service any pivot – no matter what brand
